§ 1325.3 Definitions.

(a) *Problem Driver Pointer System (PDPS)*. System whereby the NDR serves as a conduit for retrieving information from the State which took adverse action against a driver (State of Record) and relaying that information, without interception, to the State requesting the information (State of Inquiry).

(b) *Pointer Record*. A report containing the following data:

(1) The legal name, date of birth (including day, month, and year), sex, (and if the State collects such data) height, weight, and color of eyes;

(2) The name of the State transmitting such information; and

(3) The social security account number, if used by the reporting State for driver record or motor vehicle license purposes, and the motor vehicle operator's license number of such individual (if that number is different from the operator's social security account number).

(c) *PDPS State*. A State which participates in the pilot test program or, upon completion of the pilot test program, in the PDPS, by submitting pointer records for inclusion in the NDR file and by providing information to States of Inquiry as a State of Record.

(d) *Non-PDPS State*. A State which operates under the current NDP by submitting complete substantive adverse driver licensing data to the NDR.

(e) *Match*. When the personal identifying information in an inquiry compares with the personal identifying information on a record in the NDR file such that there is a high probability that the individual identified on both records is the same person.

(f) *Fully Electronic Register System*—NDR system in which all States that are participating in the NDR have been certified by the agency as participating States.
